

# Accounts payable, automated with SEMINE

Our data-driven AI software saves time, reduces costs, eliminates errors and drives smarter decisions.

## Why SEMINE?

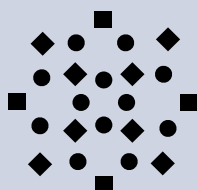

- Built for finance teams who want real automation, not more systems to manage
- Achieve high, consistent, and quantifiable automation rates
- Gain full transparency, control, and compliance powered by explainable AI
- Go-live fast, with minimal IT dependency
- Measurable efficiency and data quality gains from day one

## How does SEMINE work?

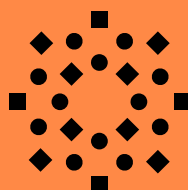

### Listening

SEMINE automatically captures and validates all relevant invoice data across formats and channels, creating a single, structured source of truth for AP.

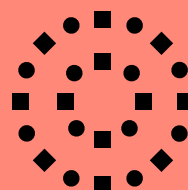

### Learning

Our AI continuously learns from invoice patterns, approvals, exceptions, and outcomes, improving accuracy and identifying new automation opportunities over time.

### Solving

SEMINE automates coding, routing, matching, and approvals, resolving day-to-day AP challenges while keeping finance in control.

### Improving

With real-time insights and end-to-end automation, SEMINE helps finance teams save time, increase quality, and move towards true AP autonomy.

85%

accounting chores  
fully automated

## What sets SEMINE apart

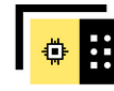

### Artificial intelligence

AI automatically captures, allocates, and posts invoice data (down to line level), so your AP process runs faster, cleaner, and with far less manual work.

### Explainable automation

SEMINE shows confidence scores and automation triggers, so your team can focus on deviations rather than controlling every invoice.

### Fast Learning AI

Manual labour gets eliminated with SEMINE's effective machine learning. Our AI requires only a small amount of data and learns quickly through a few iterations.

### Scalability

More clients? No problem. SEMINE scales automatically with your business, helping you handle more invoices, more entities, and more complexity, without adding headcount.

### Multi-Company

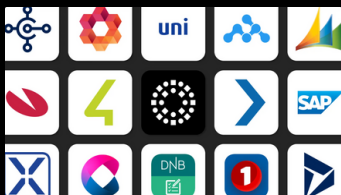

Manage multiple companies and datasets from a single, intuitive view. SEMINE allows teams to view and customise multiple datasets in a single grid and share views based on roles.

### Actionable insights

SEMINE structures spend data automatically, giving you clear visibility for analysis, reporting, and smarter sourcing decisions, with easy connections to tools like Power BI and Tableau.

## Seamless integration

Our seamless integration capability connects SEMINE to key ERP, accounting platforms and financial systems. If you don't see your system, that's where the SEMINE API comes in. Using our open API and ready connectors, partners have built many integrations themselves, connecting SEMINE to the systems they use.

## Customer stories

### **norwegian** ✈

#### About

The Norwegian group is a leading Nordic aviation company, headquartered in Norway. The company has over 8,200 employees and owns two of the prominent airlines in the Nordics: Norwegian Air Shuttle and Widerøe's Flyveselskap.
